# FRESH SHOP ( TUGAS KULIAH).

A woman wearing a straw hat and a black t-shirt is smiling and holding a bunch of dark red grapes in her right hand. She is standing behind a wooden basket filled with various fresh vegetables, including eggplants, green and red bell peppers, and a red bell pepper. The background is a solid bright green.

# ELERANA WEB VERSION

[CLICK TO VIEW WEBSITE](#)

The screenshot shows a dark-themed website for grammar learning. On the left, there's a sidebar with sections for '1. Introduction to Grammar' and '2. Tenses'. The main area features a large 'Welcome to Grammar Learning!' heading. A central feature is a dark-colored AI chatbot window with a friendly AI named 'ELERANA'. The bot's message bubble says: 'Hai, Bunnga! This is an AI bot that will be your assistant for learning English at an intermediate level. I will help check your grammar and respond to your messages just like a friend.' Below this, a user message bubble says 'DO you want be my friend?' followed by a 'Hide Feedback' button. The bot's response is: 'Incorrect: DO you want be my friend? Explanation: The verb "be" needs to be in the to-infinitive form. Correct: DO you want to be my friend?' At the bottom of the bot's window, there's a message: 'As an AI language model, I am not capable of forming personal relationships or friendships. I am designed to...'. A text input field at the bottom says 'Type your message here...' with a 'Send' button. A blue speech bubble icon is also present.

Welcome to Grammar Learning!

ELERANA

Hai, Bunnga! This is an AI bot that will be your assistant for learning English at an intermediate level. I will help check your grammar and respond to your messages just like a friend.

DO you want be my friend?

# ELERANA TELE BOT VERS

## - SPEAKING PARTNER -

Elerana is a Telegram chatbot designed to serve as a speaking partner for English learners. It supports both text and audio interactions, allowing users to practice speaking and receive real-time grammar corrections. Leveraging advanced AI technology, Elerana provides natural and contextually relevant responses, creating a more human-like and interactive learning experience. The chatbot aims to enhance users' speaking skills and grammar understanding through realistic conversational practice.
